

# Outdoor Shades

## MEASURING INSTRUCTIONS

### 1. CHOOSE YOUR MOUNT

#### Inside:

- Mounted within the window frame
- A clean, uncluttered look
- For mounting depth requirements, refer to our "Specifications" tab online for each product you are ordering

#### Outside:

- Shade is mounted to the wall, ceiling or molding around the window
- Makes window area appear larger; helps hide unattractive windows or molding
- Requires at least 2" of flat space above window molding for mounting brackets

### 2. MEASURE YOUR WINDOW

#### Inside:

- Step 1: Measure the inside width at the top of the window. Round down to the nearest  $\frac{1}{8}$ ". This is your ordering width.
- Step 2: Measure the height at 3 places: left side, middle and right side. Round up to the nearest  $\frac{1}{8}$ ". Enter the longest measurement on your worksheet. This is your ordering height.
- Note: Outdoor shade fabrics may be at least  $1\frac{3}{8}$ " narrower than your ordering width to allow for the mounting brackets. If this will create too much of a light gap in your window, please consider ordering an outside mount shade.

#### Outside:

- Step 1: Measure the width of the area you want to cover. We recommend adding at least 3 inches ( $1\frac{1}{2}$ " on each side) for maximum light coverage. Enter this width on your worksheet; it is your ordering width and the width of the shade.
- Note: Outdoor shade fabrics may be at least  $1\frac{3}{8}$ " narrower than your ordering width to allow for the mounting brackets. If this creates too much of a light gap, please add additional width.
- Step 2: Measure the height of the area you want to cover, adding 3 inches if you like. Enter this height on your worksheet; it is your ordering height and the height of your shade.
