Cleaner Look & Fuller View

The EuroVue Shutter offers a cleaner look with no visible hardware and mitered corners to make your new EuroVue Shutter look like a clean, contemporary part of your window. The EuroVue’s design is also free of obstructing frames, so just opening the louvers gives you a fuller view to the outside that other shutters can’t match.
Easy to Install

Specifically designed for the Do-it-Yourselfer, EuroVue is the only shutter on the market that installs as easily as a blind. Simply attach two to three hinges (depending on shutter size and style) and you’re done — your beautiful EuroVue Shutter is installed and fully functional.

Go to www.baliblinds.com/shutters to view installation videos.

Mount Hinge Plate    Snap on Shutters    Complete!
Determine Window Type

The EuroVue Shutter is designed to be a simple DIY project. Complete the following worksheet to order the right shutter for your home. Please note there are some situations where the EuroVue will not work. In those situations, you should select another product from our full line of Bali custom window treatments.

**DRYWALL-WRAPPEd WINDOWS**

- Shutters will completely cover window.
- Drywall-wrapped Window
- Drywall-wrapped Window with Sill

If this is your window type, See page 5.

**WOOD-WRAPPEd WINDOWS**

- Shutters will fit inside your window opening.
- Wood-wrapped Window
- Wood-wrapped Window with Sill

If this is your window type, See page 6.
Drywall-wrapped Window

**REQUIREMENT: CHECK FOR CLEARANCE**

Check for sufficient clearance for shutter mounting by measuring wall around window edge.

Drywall-wrapped Window WITHOUT SILL There must be at least 2 1/8" of clearance on all four sides.

Drywall-wrapped Window WITH SILL There must be at least 2 1/8" of clearance on all three sides.

**1 MEASURE DEPTH OF WINDOW OPENING TOWARD THE GLASS TO THE FIRST OBSTRUCTION**

The first obstruction could be a...

- Window Frame
- Handle on Double Hung Window
- Crank Handle on Casement Window

**OR**

Go to page 8 to select options.

**2 MEASURE WINDOW WIDTH**

Measure in positions A,B,C and enter the largest of the three widths.

Enter the LARGEST measurement of the three widths.

**3 MEASURE WINDOW HEIGHT**

Measure in positions D,E,F and enter the largest of the three heights. If there's a sill, measure from top of sill.

Enter the LARGEST measurement of the three heights.

Go to page 8 to select options.
Wood-wrapped Window

REQUIREMENT: CHECK FOR SQUARENESS

Measure to see if your window is SQUARE.
Measure from opposing corners and record your measurements in the spaces below.

Calculate the DIFFERENCE between the two measurements. A - B = C

If the DIFFERENCE between the two measurements is MORE THAN 1/4", please consider another Bali window treatment.

REQUIREMENT: CHECK DEPTH OF WINDOW OPENING TOWARD THE GLASS TO THE FIRST OBSTRUCTION

The first obstruction could be a...
Window Frame
Handle on Double Hung Window
Crank Handle on Casement Window

Enter the SMALLEST measurement of any of these conditions.

IS YOUR WINDOW A TILT-IN OR A NON TILT-IN? (CHOOSE ONE)

Tilt-in Window
FOR Tilt-in Window
Less than 3½" depth?
If so, please consider another Bali window treatment.

3½" depth or greater?
Please continue to Step 1.

Non Tilt-in Window
FOR Non Tilt-in Window
Less than 1¼" depth?
If so, please consider another Bali window treatment.

1¼" depth or greater?
Please continue to Step 1.
1. **MEASURE WINDOW WIDTH**

Measure in positions A,B,C and enter the smallest of the three widths.

Enter the SMALLEST measurement of the three widths.

2. **MEASURE WINDOW HEIGHT**

Measure in positions D,E,F and enter the smallest of the three heights. If there’s a sill, measure from top of sill.

Enter the SMALLEST measurement of the three heights.

Go to page 8 to select options.

Choose more options

**SELECT LOUVER SIZE**

Two different louver sizes are available to let you choose the look that’s right for you.

- **2 1/2" Louver**
  - A perfect size without overwhelming other design elements in your room.

- **3 1/2" Louver**
  - Provides design versatility that can accommodate any décor and offers great view to the outside when open.

**SELECT SHUTTER COLOR**

- Snow White 1922
- Silk White 1603
- Dove White 1683
- Cream White 1026

Enter color number below.

**DECIDE WHETHER YOU WANT OR NEED A DIVIDER RAIL**

Divider rails are used to add strength to tall shutters. Shutters taller than the maximum height listed under the panel edge designs on page 8 will automatically include a centered divider rail.

Divider rails can also be added to shorter shutters as a decorative element or to create a top open/bottom closed effect that maintains privacy while letting in light. In this case, the divider rail can be centered or placed anywhere up to four louvers from the top or bottom of the shutter. To order a divider rail that is not centered, measure from the bottom of your window opening to the point where you want the center of the divider rail located.

Enter “yes” or “no.”

**DETERMINE TILT TYPE**

- **Standard Tilt**
  - Standard tilt features a tilt bar on the front of the panel.

- **Hidden Tilt**
  - Stainless steel tilt bar on back of panel (on hinge side) requires additional 1/8" clearance.

Enter tilt type type below.
Order Information Worksheet

Please use the notes from prior pages to complete. Bring this worksheet to the store to place your order.

**NOTE: USE THE BELOW SECTION FOR THE MEASUREMENTS OF ONE WINDOW ONLY.**
